DIDDE ISAAC

SOC ANALYST L1 – THREAT DETECTION | INCIDENT RESPONSE

diddeisaac@gmail.com | +91 72239 67442 | Bhilai, India | https://isaacdidde.github.io/Portfolio/

SUMMARY

SOC Analyst L1 candidate with hands-on experience using Splunk, Wazuh, and Suricata for alert triage, log analysis, detection, and vulnerability assessment. Experienced in TCP/IP and DNS traffic analysis, Windows Event Logs/Sysmon, MITRE ATT&CK mapping, NIST CSF, and incident response workflows. Brings 11 months of 24x7 operational support experience with 100% SLA adherence, high-volume ticket triage, and structured Tier 1-Tier 2 escalation.

EDUCATION

- Master of Computer Applications (MCA), CSVTU, Durg - *Jul 2026* | CGPA: 8.2
- Bachelor of Science in Computer Science, HYV, Durg - *May 2024 | CGPA: 6.7*

CERTIFICATIONS

- Google Cybersecurity Professional Certificate, Coursera - *Feb 2026*

SKILLS

- **SIEM and Detection:** Splunk, Wazuh, EDR, Suricata IDS/IPS, SPL, log analysis
- **Threat and Incident Response:** MITRE ATT&CK, incident response, phishing analysis, Alert Triage
- **Network and Analysis:** TCP/IP, DNS, Wireshark, Nmap, Windows Event Logs, Sysmon
- **Frameworks and Methodologies:** NIST CSF, Incident Response Lifecycle
- **Systems and Scripting:** Linux (Kali, Ubuntu), Python, Bash

SECURITY PROJECTS

SOC Analyst Lab Portfolio - Incident Investigations *Apr 2026* - Present

- Investigated multi-stage security incidents involving malicious PowerShell, Windows event log tampering, RDP brute-force attacks, and web application vulnerabilities using EDR telemetry, Sysmon, and network logs; correlated events to reconstruct attack timelines and validate alerts.
- Performed SOC alert triage, IOC analysis, and root-cause investigation across Windows, web, and network security cases; mapped attacker TTPs to MITRE ATT&CK and distinguished true-positive alerts from false positives using supporting evidence and activity baselines.
- Developed and validated custom detection rules using Wazuh, Suricata, and Splunk; documented end-to-end incident investigations, attack timelines, findings, and containment recommendations in published SOC case studies, including LetsDefend investigations.

Network Threat Detection Lab - Suricata IDS/IPS & Splunk SIEM *Jan 2026* - Present

- Configured Suricata IDS/IPS with custom rules to detect and block TCP SYN scans, SYN floods, UDP scans, ICMP reconnaissance, HTTP directory enumeration, and command injection attempts in a Kali-to-Ubuntu lab.
- Tuned Suricata rules to reduce false positives and validated detection and inline blocking using controlled attack traffic, with Splunk ingesting EVE JSON and Ubuntu logs for investigation.
- Created Splunk SPL searches, correlation rules, and alerts for network and host-based activity, including SSH brute-force attempts and successful logins following repeated failures; mapped findings to MITRE ATT&CK.

EXPERIENCE

Customer Support Executive at Niftel Communications (Blinkit Process) *Mar 2023 - Jan 2024*

- Sustained 100% SLA adherence across 11 months of 24x7 shift-based support by triaging and prioritizing 40 to 50+ tickets daily through priority-based routing and structured escalation - the same triage discipline SOC alert queues demand.
- Resolved critical Tier 1-Tier 2 escalations by conducting root-cause analysis and documenting findings in knowledge-base runbooks, mirroring the investigation-and-documentation workflow used in incident response.
