DIDDE ISAAC

SOC ANALYST – THREAT MONITORING AND INCIDENT RESPONSE

diddeisaac@gmail.com | +91 72239 67442 | Bhilai, India | https://isaacdidde.github.io/Portfolio/

SUMMARY

SOC Analyst L1 candidate with hands-on experience using Splunk, Wazuh, and Suricata for alert triage, log analysis, detection, and incident investigation. Experienced in TCP/IP and DNS traffic analysis, Windows Event Logs/Sysmon, MITRE ATT&CK mapping, and incident response workflows. Brings 11 months of 24x7 operational support experience with 100% SLA adherence, high-volume ticket triage, and structured Tier 1-Tier 2 escalation.

SKILLS

- **SIEM and Detection:** Splunk, Wazuh, EDR, Suricata IDS/IPS, SPL, log analysis
- **Threat and Incident Response:** MITRE ATT&CK, incident response, phishing analysis, alert triage
- **Network and Analysis:** TCP/IP, DNS, Wireshark, Nmap, Windows Event Logs, Sysmon
- **Frameworks and Methodologies:** NIST CSF, Incident Response Lifecycle
- **Systems and Scripting:** Linux (Kali, Ubuntu), Python, Bash

SECURITY PROJECTS

SOC Analyst Lab Portfolio - Incident Investigations *Apr 2026* - Ongoing

- Investigated multi-stage attack scenarios (log tampering, malicious PowerShell, command injection) using EDR telemetry and Sysmon, mapping TTPs to MITRE ATT&CK
- Triaged web and authentication logs to extract IOCs, reconstruct attack vectors, and validate true-positive alerts against network baselines.
- Authored published SOC case studies (featured by LetsDefend) covering end-to-end alert triage, root-cause analysis, and NIST-aligned remediation.

Network Threat Dectection Lab – Suricata IDS/IPS & Splunk SIEM *Jan 2024 - Ongoing*

- Simulated multi-stage attack chains (Nmap recon, Hydra brute-force, reverse shells, exfiltration) using Kali Linux against Ubuntu, configuring Suricata IDS/IPS with NFQUEUE for inline packet drops.
- Engineered Splunk ingestion & SPL correlation by forwarding eve.json and auditd logs via Universal Forwarder to chain low-fidelity alerts into high-confidence MITRE ATT&CK detections.
- Automated attack execution and health checks using custom Bash scripts; full architecture, SPL queries, and PCAP analysis documented on portfolio.

EXPERIENCE

Customer Support Executive at Niftel Communications (Blinkit Process) *Mar 2023 - Jan 2024*

- Sustained 100% SLA adherence across 11 months of 24x7 shift-based support by triaging and prioritizing 50 to 80 plus tickets daily through priority-based routing and structured escalation.
- Managed critical escalations and Tier 1-Tier 2 handoffs by conducting root-cause analysis on escalated cases and documenting findings in knowledge-base runbooks using defined escalation procedures.
- Recognized by Blinkit's Customer Delight Head for precise ticket categorization and reliability in time-sensitive, stakeholder-facing work.

EDUCATION & CERTIFICATIONS

- Bachelor of Science in Computer Science, HYV, Durg - *May 2024*
- Master of Computer Applications (MCA), CSVTU, Durg - *Jul 2026*
- Google Cybersecurity Professional Certificate, Coursera - *Feb 2026*
- CompTIA Security+ (SY0-701) - In Progress - Target: Sep 2026
